6. Reasonable Necessity: These rules are being proposed pursuant to legislation enacted during the 2003 and 2005 legislative sessions. The main purpose of these rules is to ensure the full implementation of updates to election laws that were passed during these legislative sessions. The rules attempt to continue to ensure that every eligible Montanan is able to exercise his or her right to vote, while at the same time protecting the integrity of the election process.

The cumulative effect of the change in the cost of the database lists and extracts to the entities that have purchased the lists in the past is a decrease of about \$2,000.00 in cost. Additional files and extracts will be available for the first time as a result of the creation of the statewide voter database, and there will be a number of individuals and entities who will purchase the file and/or extracts for the first time. The cost to the entity or individual will depend on the file or extract they choose to purchase. The number of entities affected by this rule is five to ten. This is based upon the number of current purchasers. The number of new customers is estimated to be 20 to 50.

Certain rules relating to voting systems are being proposed to be repealed because they refer to and regulate the use of technology and systems that are no longer in use. A rule relating to challenges is being proposed to be repealed since it is included in amended form in a new section of the proposed rules.
